

**Design out the box**

# Water Park

## CONTEXT

Your design company and engineers have been commissioned by the 'Tussards Group' to design a new type of water theme park to rival Alton Towers version. The style and theme of this new water park is entirely up to you and your designers. The park must include up to date slides and water features for the younger generation and more sedate rides for the older generation and young children. The water park must include all the usual features such as, café's, restaurants, shops, arcades, boating lake, stalls, theatre, cinemas, toilets, car park, etc.

## DESIGN TASK

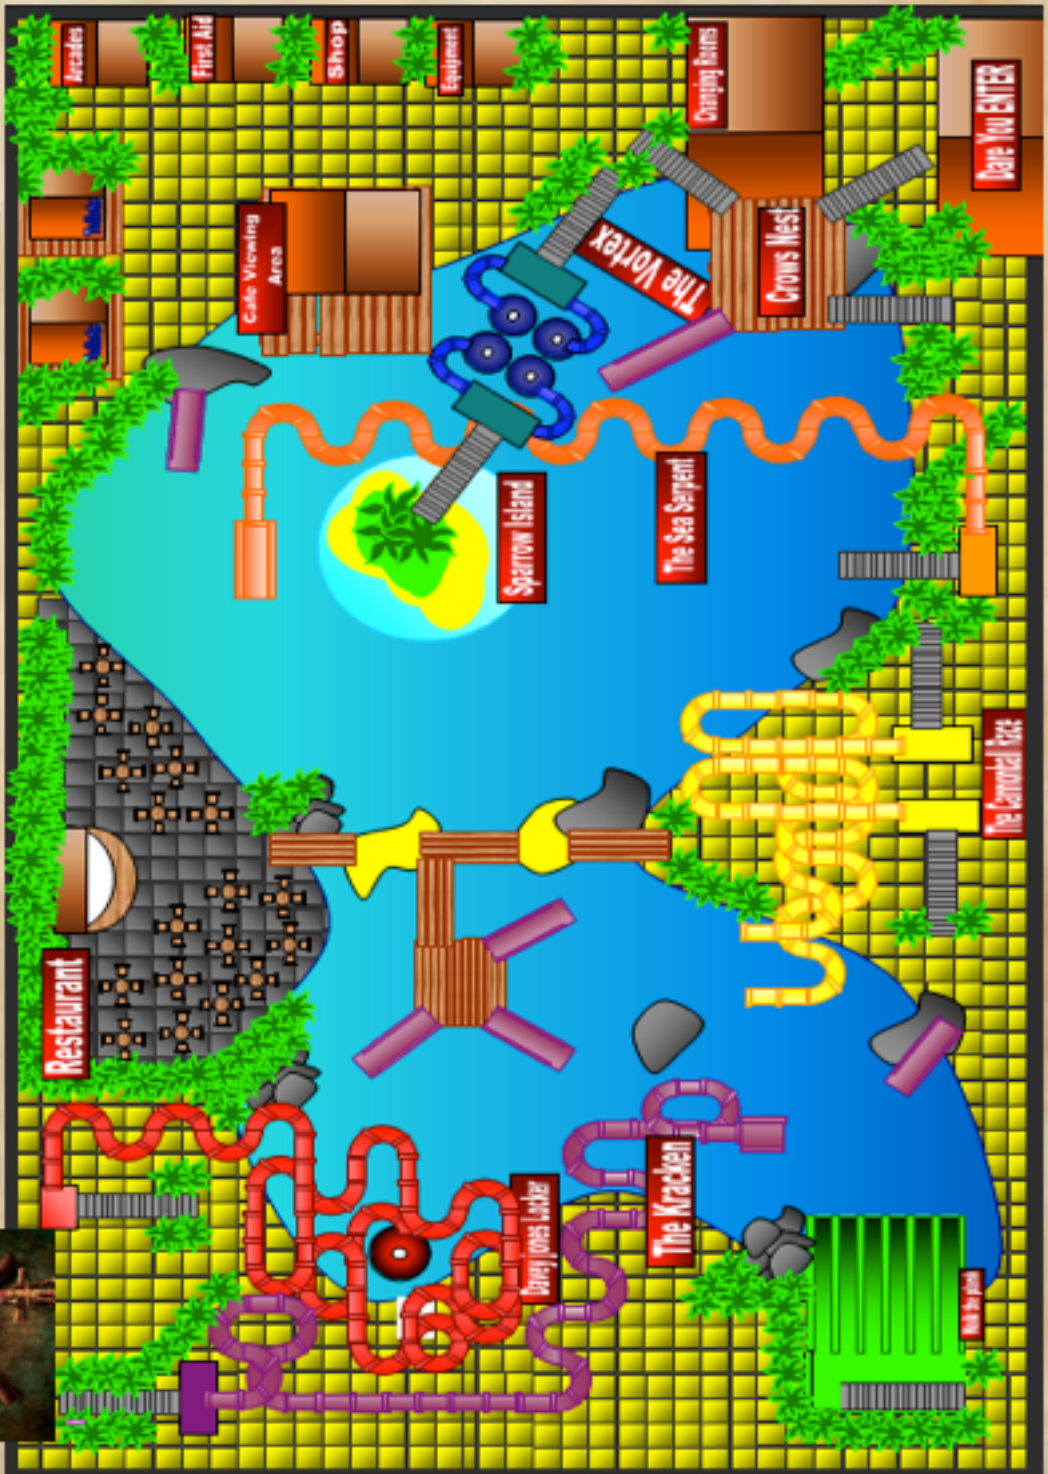

The New Water adventure theme park MUST have a theme and the rides must be based around that theme, Camelot was based around a medieval theme, American adventure is based around the wild west etc. Maybe "pirates of the Caribbean". The Company has provided a map of where the water park is to be based inside and it's up to you if you wish to use the features to your advantage or you can work around them. The company may also wish you to model your idea in 3D CAD.

# Water Park

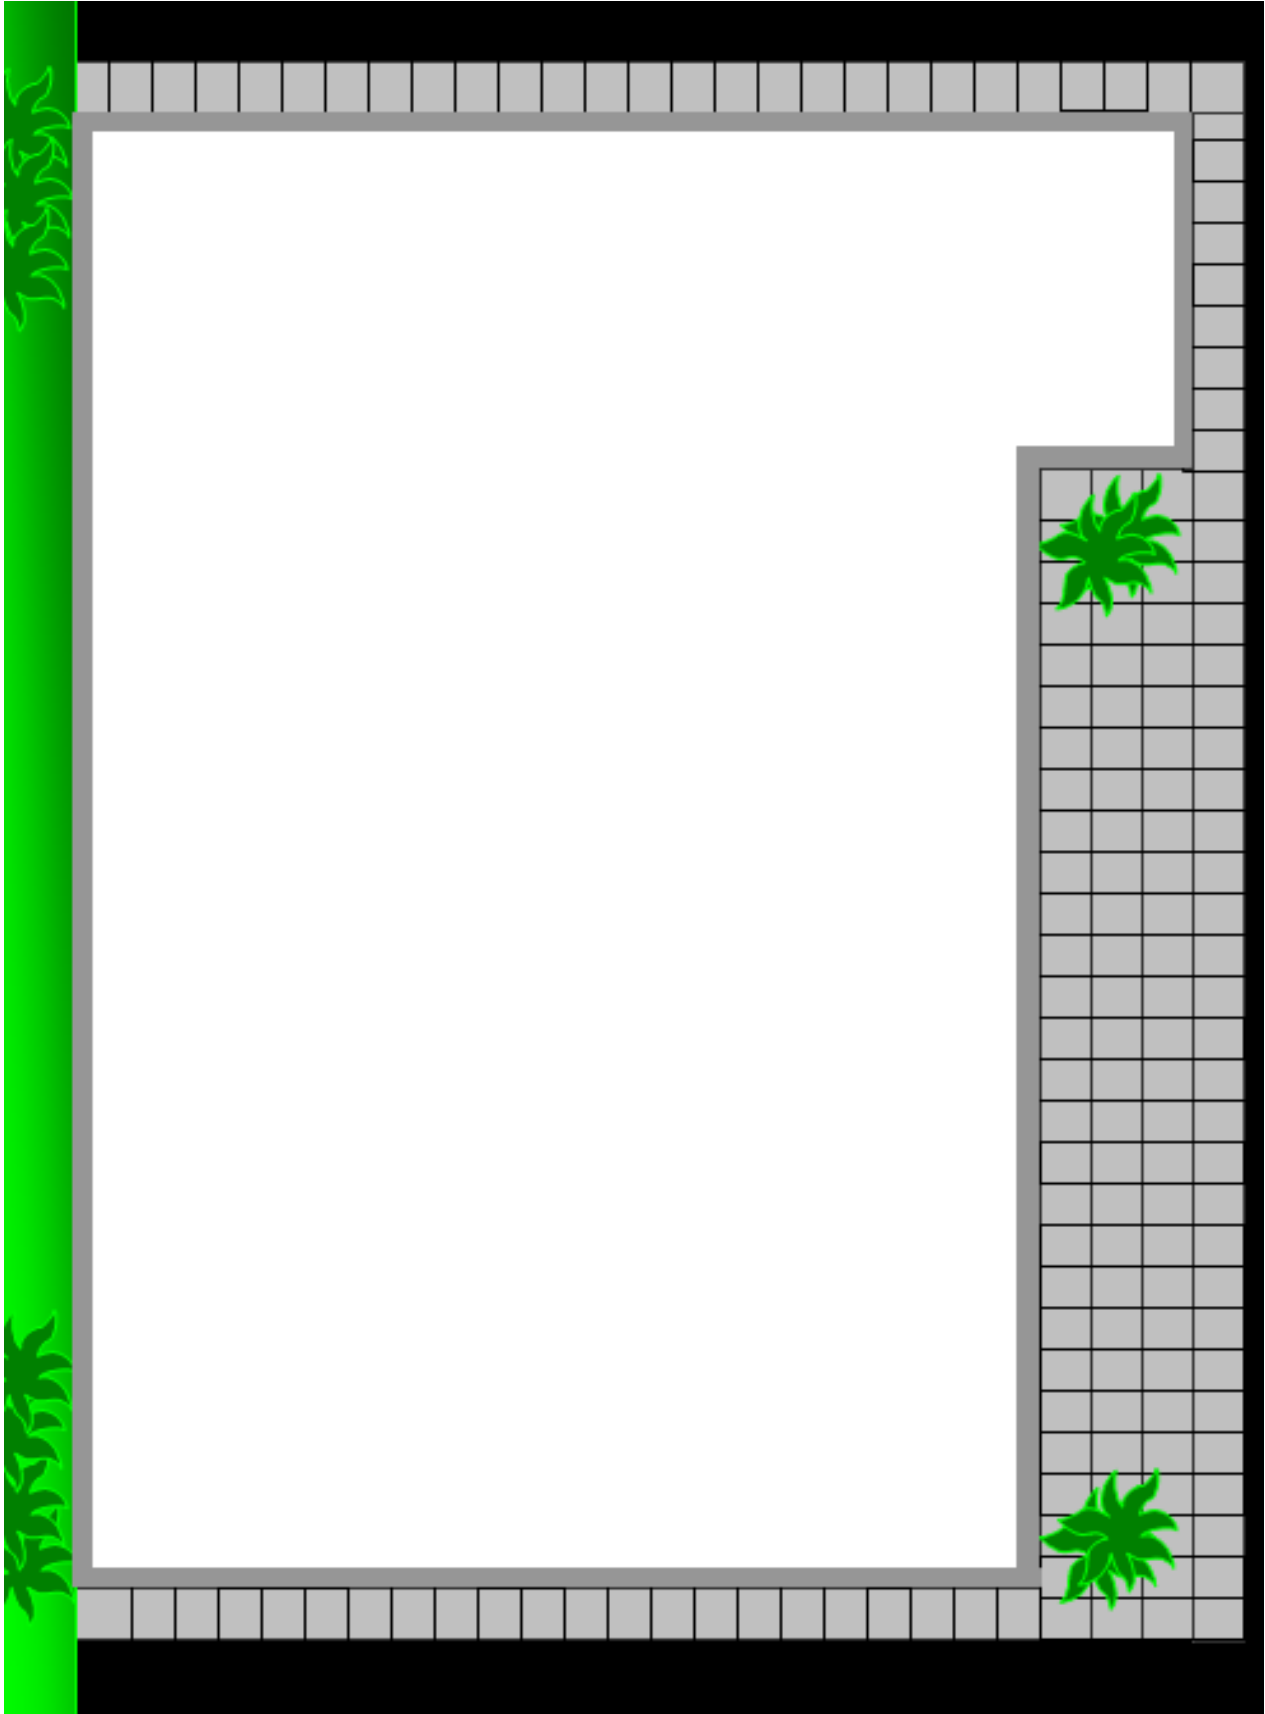

## PIRATES of the CARIBBEAN

# Water Park

The waterpark is to be based inside the building shown below. Design two different waterparks.
